"Having migrated from England to Jamaica, I recognised the need to assist those in the diaspora and those who have returned home"

Founder of Home and Away Jamaica

BUILDING YOUR DREAM HOME IN JAMAICA

- Do you have a piece of land you want to build on?
- Do you have a Title deed for the land in your name?
- Do you have a Surveyor's Diagram for the land?

If the answer to all these questions is YES then you may be able to fulfil your dream to build your affordable home "on a piece of the rock" - 4,700 miles away!

- Do you require your sketch layout plans drawn up?
- Do you want your building plans submitted for Parish Council approval?
- Do you require a Builder with a contract to construct your house?
- Do you require progress reports throughout construction?

If you want the job to run smoothly it is worth employing the service of an Architect who will be not just draw up your plans but will be work with you throughout the different stages from your initial ideas, outline brief, all the way until practical completion on site and handing over the keys.

An Architect will use his expertise to build a house to suit your requirements, the site, be functional, practical and with good aesthetics using materials and finishes you desire. To keep to budget the architect will work with a quantity surveyor to finalise the specification and construction cost prior to the selection of a builder/contractor to commence work on site.

From Concept model to Construction to Completion
